Flu shots

The flu affects millions of people each year and can lead to serious illness, or even death. The flu can be a contagious illness caused by influenza viruses that infect the lungs, throat and nose. According to the Centers for Disease Control and Prevention (CDC), one of the best ways to prevent the flu is by getting vaccinated each year.¹ The CDC recommends a yearly flu vaccine for everyone 6 months of age and older, as the first and most important step in protecting against this serious disease.²

Routine vaccines

You can also keep yourself and your family members healthy with routine vaccines that prevent illnesses like tetanus, pneumonia and shingles. Routine vaccines are available on most plans, and can help you and your family maintain better overall health.

Easy access to flu shots and other vaccines

OptumRx contracts with a variety of national pharmacy chains to provide members with easy access to flu shots and other routine vaccines. Plus, members get the highest level of benefit coverage (100% for many plans) for vaccines obtained from contracted pharmacies that participate in the Vaccine Immunization/Injection Network administered by OptumRx.³

Many vaccines can be obtained on a walk-in basis by presenting the OptumRx ID card at the time of service. Members should review their benefit plan to determine coverage for vaccines.
